Zürcher Hochschule der Künste

This year's LaborDigital conference takes a closer look at the unpredictable, the unconventional, the weird! We interrogate the dark, radical, bizarre and philosophical corners of technology. We explore the format of hands-on and theoretical labs to get insights into the metaphors, the power, the play in which technology impacts higher education, society, art and design. What answers do we get from the intelligence of slime, the curated post-mortem survival of personal data, the epistemology of the erotic or sustainable artistic research? Come and join the discourse!

The conference is organised by the E-Learning, Dossier Learning & Teaching of the ZHdK and is part of the „Experimental Learning Labs" of ELLA. ella.zhdk.ch Programme & registration: link.zhdk.ch/LaborDigital24
